Data Note: The Traffic Profile displays up to 25 of the closest available traffic counts within the largest radius around your site. The years of the counts in the database range from 2010 to 1963. Just over 66% of the counts were taken between 2001 and 2010 and 86% of the counts were taken in 1997 or later. Traffic counts are identified by the street on which they were recorded, along with the distance and direction to the closest cross-street. Distances displayed as 0.00 miles (due to rounding), are closest to the site. A traffic count is defined as the two-way Average Daily Traffic (ADT) that passes that location.
